

FAHEEM AHMED

Mysuru, Karnataka, India | LinkedIn: [linkedin.com/in/faheem-ahmed-dev](https://www.linkedin.com/in/faheem-ahmed-dev) | GitHub: github.com/faheem1309 | Available for Full-Time On-Site Role

PROFESSIONAL SUMMARY

Dedicated and technically proficient Computer Science educator and full-stack developer with hands-on experience in curriculum development, digital content creation, and educational technology integration. Demonstrated ability to break down complex computer science and programming concepts into structured, accessible lessons for diverse learners — including beginners, students, and non-technical audiences. Creator of 17+ real-world software projects spanning web development, AI, data management, and cloud computing. Passionate about interdisciplinary learning, inclusive education, and leveraging technology as a universal equalizer. Committed to fostering student growth through structured lesson planning, hands-on coding exercises, and collaborative curriculum development.

EDUCATION

Diploma in Computer Science and Engineering (Final Year)

JSS Polytechnic for the Differently Abled, Mysuru | 2023 – 2026 (Expected)

- Completed DCET 2026 (Diploma Common Entrance Test) — May 23, 2026, qualifying for lateral entry into B.E. Computer Science Engineering.
- Submitted comprehensive final-year industrial internship report on backend data operations and database management systems.
- Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Mathematics for Computer Science, Software Engineering.

TEACHING & EDUCATIONAL EXPERIENCE

Technical Content Creator and Educator (Computer Science)

YouTube (Self-managed Educational Channel) | Mysuru, Karnataka | Jun 2025 – Present

- Designed and delivered structured lesson plans covering computer basics, software skills, web development fundamentals, and digital literacy tailored for beginners and non-technical learners.
- Developed complete curriculum pathways including learning objectives, instructional sequencing, and progressive skill-building modules aligned with learner readiness levels.
- Scripted, recorded, and produced educational video content applying instructional design principles — pacing, scaffolding, and concept chunking — to maximise learner comprehension.
- Applied interdisciplinary approaches by integrating mathematics concepts (logic, binary systems, set theory) into computer science lessons to strengthen foundational understanding.
- Actively engaged with student/learner community, gathered feedback, and iteratively improved lesson quality and curriculum relevance.

Founder and CEO — Skillverse Technologies (EdTech Learning Ecosystem)

Self-Employed | Mysuru, Karnataka (Remote) | Nov 2025 – Present

- Leading the development of an affordable, accessible, and inclusive digital learning ecosystem focused on computer science education for underserved and differently-abled learners.
- Designed curriculum frameworks and structured learning pathways covering programming, web development, data science, and cloud computing for beginner to intermediate learners.
- Collaborated with a global network of developers, educators, and mentors to align educational content with real-world industry standards and learning outcomes.
- Integrated educational technologies including LMS platforms and digital assessment tools to enhance student engagement and track learning progress.

Technology Specialist — Assistive Technology Showcase

All India Institute of Speech and Hearing (AIISH), Mysuru | Feb 2025 | On-Site

- Presented and demonstrated innovative assistive technology solutions designed for differently-abled individuals, communicating technical concepts to a diverse audience of specialists, educators, and students.

- Highlighted the role of accessible computing in enabling inclusive education and bridging the digital divide for students with disabilities.

INTERNSHIP & PROFESSIONAL EXPERIENCE

Program Monitoring, Evaluation and Data Management Intern

Magic Bus India Foundation | Bengaluru, Karnataka (Remote) | Dec 2025 – Apr 2026 | 640 Hours | Cert. No: ECPL/INT/2026/011

- Managed and validated batch-wise trainee records for large-scale training programmes using advanced MS Excel and Google Sheets data validation techniques.
- Cleansed and standardised complex datasets, eliminating duplicates and ensuring data integrity across programme records — a process directly analogous to database management concepts taught in computer science curricula.
- Designed and compiled weekly operational performance dashboards using structured data reporting and introduced standardised reporting templates to improve organisational efficiency.
- Applied mathematical reasoning and analytical thinking to cross-verify programme metrics and generate executive-level reports.

KEY PROJECTS — APPLIED COMPUTER SCIENCE

Holy Quran Mushaf App (PWA) | *HTML5, CSS3, JavaScript, Service Workers*

- Built a full-scale installable Progressive Web App with offline-first architecture, dual-page layout, verse-level audio sync, and local state persistence — demonstrating advanced web development and software engineering principles suitable for classroom instruction.

Zikra AI Assistant | *Python, NLP (TextBlob)*

- Developed a command-line AI assistant using Natural Language Processing and sentiment analysis — a project directly applicable to teaching AI/ML fundamentals and Python programming.

Spring Boot CRUD Applications | *Java, Spring Boot, MySQL*

- Architected enterprise-style backend systems with RESTful APIs and relational database schemas — aligning with computer science curricula covering DBMS, networking, and OOP.

Student Marks Manager | *React.js, Vercel*

- Built an academic tracking web application enabling real-time weighted grade estimations and score validation — directly relevant to educational data management contexts.

Smart Calculator (V2) | *HTML5, CSS3, JavaScript*

- Engineered a dual-mode Standard and Scientific calculator with persistent history log, reinforcing mathematics and logic concepts applicable to CS education.

Islamic Quiz App (EdTech) | *HTML5, CSS3, JavaScript*

- Built an educational quiz application with randomised question generation, instant visual feedback, and granular scoring — directly applicable as an EdTech classroom tool.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript (ES6+), HTML5, CSS3

Web & App Development: React.js (v19), React Router 6, Progressive Web Apps (PWA), Service Workers, REST APIs

Database & Data Management: MySQL, MS Excel (Advanced), Google Sheets, Data Validation, Power BI, Tableau

Cloud & Infrastructure: Linux Systems Administration, Kubernetes (Container Orchestration), Cloud Computing, Vercel Deployment

AI & Automation: Natural Language Processing (TextBlob), Prompt Engineering, Python Scripting, Workflow Automation

Educational Technologies: LMS Platform Administration, Curriculum Design Tools, Digital Assessment Tools, Video Production

Mathematics for CS: Logic, Binary Systems, Set Theory, Algorithm Analysis, Data Structures

Soft Skills: Lesson Planning, Curriculum Development, Public Speaking, Communication, Student Mentoring, Collaborative Teaching

CERTIFICATIONS (SELECTED — 32 TOTAL)

- **Applications of Cloud Computing** — FutureSkills Prime (2026)
- **Prompt Engineering: Parameters & Use** — FutureSkills Prime (2026)
- **Applications of Big Data Analytics** — FutureSkills Prime (2026)
- **Introduction to Kubernetes (LFS158)** — The Linux Foundation (2026)
- **Full Stack Java Development** — Simplilearn (2025)
- **Learning React / Introduction to React** — Infosys Springboard / IBM SkillsBuild (2025)
- **HTML5 with JavaScript and CSS3** — Infosys Springboard (2025)
- **Power BI & Tableau** — Simplilearn (2025)
- **Cyber Security Pathway** — Simplilearn (2025)
- **Information Security Fundamentals** — Infosys Springboard (2025)
- **DevOps and SRE Fundamentals (LFS162)** — The Linux Foundation (2025)
- **Artificial Intelligence** — Simplilearn (2025)
- **Data Fundamentals** — IBM SkillsBuild (2025)
- **Professional Career Awareness** — EnAble India (2025)

ADVOCACY, LEADERSHIP & PROFESSIONAL DEVELOPMENT

- **Career & Workplace Readiness Workshop** — Completed intensive 2-day EnAble India professional development programme covering workplace ethics, professional communication, and career planning (JSS PDA, Mysuru).
- **Disability Inclusion Advocate** — Certified with Locomotor Disability (Cerebral Palsy, 75%); demonstrates through lived experience and professional practice that technological proficiency and high-order thinking transcend physical boundaries — a perspective directly enriching inclusive classroom environments.
- **DCET 2026 Qualifier** — Successfully completed the Diploma Common Entrance Test (May 23, 2026), demonstrating academic commitment and readiness for advanced computer science studies.
